

**SUPERIOR INDUSTRIAL
FOR PROCESS AND WASTEWATER
FILTRATION
GIVE A2 A SPIN**

A2's revolutionary Spin Disc Filtration Technology utilizes grooved plastic discs for superior filtration that spins clean to backwash.

This highly efficient system allows you to:

- Lower volumes –
A₂ uses less than 2% of the filtrate for backwashing
- Be flexible –
A₂ discs are interchangeable from 10-400 microns
- Filter continuously –
even during backwash cycles
- Meet your exact needs –
A₂ filtration systems are custom engineered

Call or e-mail today for our free CD presentation and give A₂'s unique filtration technology a spin. And be sure to ask about our advanced Partical Distribution Analysis.
